

DESCRIPTION

The **A4K** is an acoustically transparent front projection material that has an ultra-fine knitted smooth screen surface that provides excellent color neutrality for superb color reproduction and wide diffusion uniformity. It offers excellent audio transparency with minimal attenuation.

MATERIAL SPECIFICATIONS

- A4K 1.0 Gain acoustically transparent front projection material
- Ultra-wide viewing angle allows viewers to see a clear bright uniform picture from any seating position
- Moire-free, designed for high-resolution 4K/8K UHD projectors
- Tightly knit polyester material preserves image fidelity for clear, sharp presentations without compromising sound transparency.
- Compatible with ultra-short, short and standard throw projectors

Color: White

Thickness: 0.016" (0.41 mm)

Number of Layers: 1

Viewing Angle: 170°

Gain: 1.1

Weight: 0.37 lb. (171.5 g) /m2

Projection Type: Front

Material Composition: 100% Polyester

Mean Attenuation: -2.79 dB

GAIN CHART

On axis 0° Gain: 1.0
Viewing Cone: 170°
